Strategic Developer Report

SOPERA GmbH

December 11, 2007
San Francisco

Leveraging Eclipse

- *Products shipping or planned?*

  - SOPERA ASF 3.x in 2008
  - SOPERA ASF 4.x in 2009 (based on Swordfish)

- *What Eclipse projects are you re-distributing with your products?*

  - Swordfish (planned for Release 4 in Q3 09)
  - WTP
  - STP
  - BPEL Editor
  - Equinox/P2 (planned)

Leadership at Eclipse

- *What projects led?*

  RT.Swordfish (SOA Runtime Framework)

- *What other Eclipse initiatives led or participating (working groups, etc.)?*

  - Eclipse RT
  - Strategy Committee
  - Presentations at the EclipseCON und ESE 08

Investment in Eclipse – Dash Report

Company / Project Commit Details

This automatically collected information may not represent true activity and should not be used as sole indicator of individual or project behavior.
See the wiki page for known data anomalies. To report issues or request enhancements, see bug 209711.

Company	Active Committers	Inactive Committers	Total Committers	Percent Active	Commits (2008)	Lines of Code (2008)	Approx. LOC per Commit
SOPERAGmbH	7 (1.14%)	0 (0%)	7 (0.68%)	100%	6,065 (0.48%)	6,065 (0.02%)	1

Investment in Eclipse

SOPERA has 7 active committers and 2 contributors in Eclipse projects

- SOA Tooling Project (STP)
    - Gerald Preissler (Committer)
    - Andrei Shakirin (Committer)
    - Alexey Markevich (Committer)
    - Alexandr Tselesh (Committer)

- SOA Runtime Project (Swordfish)
    - Oliver Wolf (Committer, Project leader)
    - Dietmar Wolz (Committer)
    - Andreas Mattes
    - Andrey Kopachevsky
    - Volodymyr Zhabiuk (Committer)

- Although SOPERA has 7 active committers and 2 more contributors in Eclipse projects, not all of them were available fulltime.

- The average amount of FTE in 2008 in Eclipse projects was about 5 rather than 8. So SOPERA was not able to fulfill its commitment of 8 developers in 2008.

- It is planned to increase this number up to 10 FTEs begin of Q2 2009 when the development of the new release of SOPERA ASF starts.

- This new release will be based on the Swordfish technology. As a consequence a major part of the product development will take place within Eclipse
